OFFICE OF THE CHAIRMAN

H-14-12

Work together with the Federal Highway Administration [FHWA] and the Commercial Vehicle Safety Alliance [CVSA] to revise the *Pilot Car Escort Best Practices Guidelines* and related training materials to ensure that they contain updated recommended practices for pilot/escort vehicle operations, and disseminate the revised documents to groups that provide pilot/escort vehicle driver training.

We are pleased that you worked with the FHWA, the CVSA, and other industry organizations to revise the guidelines and training materials pertaining to pilot/escort vehicle operations. We are aware that industry publications have notified readers of these updates and that they are available on the FHWA website. We commend you for your cooperative efforts to implement the recommended actions, as well as to form the North America Pilot Vehicle Safety Alliance to continue to improve pilot car operations. Accordingly, Safety Recommendation H-14-12 is classified "Closed—Acceptable Action."

H-14-24

Assist the American Association of Motor Vehicle Administrators [AAMVA] in developing training and testing materials that address the challenges and unique developed information to state licensing agencies to institute a commercial driver's license endorsement for oversize loads.

AAMVA RESPONSE TO NTSB

- AAMVA cannot institute a driver's license endorsement for oversize loads. The Federal Motor Carrier Safety Administration (FMCSA) administers and manages the commercial driver licensing system in the US and is the entity that would be responsible for creating an endorsement for oversize loads. The FMCSA would need to create the endorsement requirement in 383.93 of the FMCSR's and then create a new section in the FMCSR's that lists the skills and knowledge requirements for the oversize loads endorsement.
- Once that is done, AAMVA could modify our CDL testing system to incorporate the skills and knowledge requirements outlined by FMCSA.
- Kevin R. Lewis, Director, Driver Programs, AAMVA

National Transportation Safety Board

Washington, DC 20594 | www.ntsb.gov
OFFICE OF THE CHAIRMAN

Although AAMVA is not developing the recommended oversize loads endorsement, we commend your proactive efforts to develop driver training programs for moving and securing oversize and overweight loads. We further commend your work with the FHWA to identify best practices among state automated permit systems. These actions represent an acceptable alternate means of implementing the intent of Safety Recommendation H-14-24, which is classified "Closed—Acceptable Alternate Action."

GOAL»	To establish envelope vehicle configurations for most loads, ranging from five total axles through
	thirteen total axles.

PURPOSE» To use these configurations as a base point for discussions with individual states as well as our four state regions as we advocate widespread acceptance of more comprehensive and representative vehicle models issued under routine or auto issued permits.

NOTE»	These envelope vehicles represent the vast majority of standard vehicle configurations in our country,
	as well as being representative of the majority of permits issued by our states— but is not meant to be
	all inclusive. Please also note as indicated all dimensions are minimums.
