

(Introductions)

Bill Patchell

Tom Patchell

What is a pilot car?

A pilot car is a warning device for oversize power unit drivers; along with a warning device for the surrounding pedestrian traffic of any impending dangers and or impediments.

Pilot Escort working with law enforcement

What we have found that works the best!!!!

Discussing in detail at the route meeting with the dimensions of the load being moved; what special movement requirements need to be met; In doing so the working officers know how to conduct the severity of traffic control in order to proceed safe load movement.

Its a Team Effort!!!!

Every Team member knowing and understanding everyone's job is key

Proper Training for Escorting Officers for the
Oversize Dimensions being moved

High Loads , Wide Loads , and Long Loads all take different traffic control
actions for safe load movement

Understanding Laws of the state being worked in

Each state is different in the facets of oversize load movements!!!
